#### Type 2– part of the HEART Triad

For Enneagram Type 2, working Step One means recognizing how their deep need to be needed and loved often leads them to neglect their own needs, including their relationship with food. A Type 2 may use food as a way to soothe feelings of rejection or depletion from over-giving to others.

### 4. Surrender the Fear of Rejection or Not Being Loved:

Food might be a way Type 2s avoid facing the fear of being unloved or rejected. Admitting powerlessness means surrendering that fear and accepting that overeating won't fill the void.

### **Week 4 Reflection question:**

## "How have I used food to cope with my fear of being unloved, and how has that made my relationship with food unmanageable?"

**Summary:** Type 2s can work Step One by acknowledging how their need to give to others has led them to neglect their own needs, using food to fill emotional gaps. By admitting their powerlessness over food and receiving support, they can learn to prioritize self-care and trust that their worth isn't dependent on serving others
