

## Type 5 – part of the HEAD Triad

For Enneagram Type 5, working Step One means recognizing how their need for knowledge, privacy, and independence has influenced their relationship with food. Type 5s may use food as a way to retreat, conserve energy, or avoid emotional involvement.

### **4. Surrender the Fear of Depletion or Invasion:**

Type 5s fear that their emotional or mental resources will be depleted, and food may have been used as a way to maintain control. Surrendering this fear means recognizing that they cannot manage life or food alone.

#### **Week 4 Reflection question:**

**“How have I used food to protect myself from feeling overwhelmed or invaded, and how can I surrender that fear?”**

**Summary:** Type 5s work Step One by recognizing how their need for emotional distance and self-sufficiency has led to an unmanageable relationship with food. By admitting powerlessness and trusting in emotional engagement, they can find balance and healing.

*We admitted we were powerless over \_\_\_\_\_  
that our lives had become unmanageable*

What may make Step 1 difficult for MY Type?

Type	Passion	Type	Passion
1	I need to Keep the perfect illusion going	6	I cannot trust something I can't see
2	I Seek my "self" in others- to be loved. How could someone so giving be an addict?	7	"Managing" limits my options and it might not be fun.
3	I seek my "self" in others – to be admired- Isn't being successful proof that I'm not an addict?	8	If I'm not in charge. Who else will be in charge? If I AM in charge- I will manage!
4	I feel intense emotions that seem to take over- that IS unmanageable!	9	This feels uncomfortable. I'd rather be numb & comfortable.
5.	Knowledge is power. If I know enough I am never powerless.		

This is a summary of a potential roadblock in recovery. Try it on for fit....no worries if it doesn't quite fit- there's work ahead 😊
