

Type 6 – part of the HEAD Triad

For Enneagram Type 6, working Step One involves facing the role that fear, anxiety, and the need for security play in their relationship with food. Type 6s may use food to calm their anxieties or as a way to manage uncertainty, constantly seeking safety and reassurance.

3. Acknowledge the Need for Inner Security and Trust:

Step One encourages Type 6s to acknowledge that real security doesn't come from food or external sources, but from building trust in themselves and in a Higher Power.

Week 3 Reflection question:

“How can I begin to trust that true safety comes from within, and not from trying to control my eating or other external factors?”

*We admitted we were powerless over _____
that our lives had become unmanageable*

What may make Step 1 difficult for MY Type?

Type	Passion	Type	Passion
1	I need to Keep the perfect illusion going	6	My inability to trust prevents surrender
2	I Seek my “self” in others- to be loved. How could someone so giving be an addict?	7	Feels like surrender limits my options and it might not be fun.
3	I seek my “self” in others – to be admired- Isn’t being successful proof that I am not an addict?	8	Surrender implies I’m not in charge. Who else will be in charge?
4	My need to feel intense emotions prevents me from seeing my powerlessness	9	Surrender=stepping into life, I’d rather be numb & comfortable.

5. Knowledge is power. If I know enough I am never powerless.

This is a summary of a potential roadblock in recovery. Try it on for fit....no worries if it doesn't quite fit- there's work ahead 😊
