### Type 7 – part of the HEAD Triad

For Enneagram Type 7, working Step One means recognizing how their pursuit of pleasure, excitement, and variety has influenced their relationship with food. Type 7s may use food as a way to avoid discomfort or to indulge in endless possibilities.

### 3. Acknowledge the Need for Grounding and Stability:

Step One for Type 7s is about learning to stay present and grounded, even when life feels uncomfortable or boring. Admitting powerlessness over food means recognizing that they need stability and structure in their relationship with eating.

### **Week 3 Reflection question:**

### "What would it feel like to seek stability and balance, rather than constant excitement, in my relationship with food?"
